

**EN. SPEEDROCKER EXTENSION**

This mudguard extension accessory is only suitable for mounting on the SKS SPEEDROCKER rear mudguard (SKS Art. No. 11567). Before mounting, always check the mounting points for any cracks in the material and other damage. Only mount the extension if the SPEEDROCKER mudguard and the extension are undamaged. Foreign objects that get stuck on the extension while riding can have a negative impact on the mudguard mounts, so check regularly to make sure it is still properly mounted. Mounting rear lights, reflectors and other parts on the extension is not permitted.
